

Cooperating Technical Partners – ASFPM CTP subcommittee Monthly Call – March 15, 2019

Attendees: Alan Lulloff, Thuy Patton, Carey Johnson, Laura Algeo

Webinars

Using LIDAR for LOMAs – was held on March 6th. Webinar covered the MN pilot project, a MT project that compared LAGs derived from LIDAR vs. field surveys and Beth Norton with FEMA discussing standards for using LIDAR for LOMAs. There were 524 attendees.

The next webinar will have Carey et al presenting on their 1D/2D modeling comparison project for 2 watersheds in KT. This is scheduled for April 24th.

Someone suggested on the last webinar that we have a webinar on LOMRs

Best Practices

Alan indicated that a best practice on LOMRs would be good to complement a potential webinar on the topic.

ASFPM Conference

It was noted that the topic on the program is called CTP Conversion. I check with our conference coordinator and that is what the session was called last year. It can be changed. It was suggested that we should see if Nicol would help with an ice-breaker again this year. We discussed having some poll questions again.

Laura asked if ASFPM had finalized where on the program the CTP recognition awards would be presented. I followed up with Chad Berginnis and both the CTP and CRS awards will now become part of the Thursday awards luncheon. Mike Grimm will be presenting the awards for FEMA.
