

Cooperating Technical Partners – ASFPM CTP subcommittee Monthly Call – April 16, 2019

Attendees: Alan Lulloff, Thuy Patton, Carey Johnson, Laura Algeo

Webinars

The next webinar will have Carey et al presenting on their 1D/2D modeling comparison project for 2 watersheds in KT. This is scheduled for April 24th. The KY pilots are a rain on grid process so that it is a combined hydrology/hydraulics approach.

Someone suggested on the last webinar that we have a webinar on LOMRs.

Best Practices

Alan indicated that a best practice on LOMRs would be good to complement a potential webinar on the topic. Thuy indicated that CO has developed a CLOMR process for hydrology that could serve as a best practice. They have completed the process for the South Platte River and are also using the process for the Colorado River.

ASFPM Conference

The CTP recognition award will be on Thursday presented by Mike Grimm. Thuy indicated that she has contacted several places for the Monday night event and all require a deposit so the plan is to just show up and claim some space like we did last year. Both Thuy and Carey have a commitment from their contractors to sponsor some food and drinks at the event.

Carey and Thuy indicated that they will touch base with Nicolle regarding an ice breaker. The agenda would be similar to last year where they provided an update on the subcommittee activities, Laura provided an update and then it was opened up to Q&A. Alan will try to get a flip chart to document issues. Thuy will have a sign-in sheet so that we know who was in attendance.

Dave Knipe asked that a summary of the CTP subcommittee activities for the year be provided to him by the end of the week. He also asked if there was something we wanted on the M&ES committee meeting on Monday morning to let him know. Alan agreed to provide a 20 minute update on the floodway project.

Other topics

Here is a link to presentations at the 2018 National Hydraulic Engineering Conference held August 2018 in Columbus Ohio. The presentation by Scott Hogan on Day 2 discussed options for mapping floodways using 2D modeling. The presentation by Rachel Tereska just before Scott's is the presentation I mentioned related to the LOMR submittal <https://www.ohio.edu/engineering/nhec/upload/Post-Final-Agenda-2018-NHEC-2019-02-19-with-video-URLs.pdf>

Action Items

CTP subcommittee summary for the M&ES committee annual summary by April 19th.

Email blast to CTP contact list/M&ES committee list by May 1st.
